Wine tasting
IT solution

What is WineTaste?

WineTaste is a specially designed IT solution for organising, conducting and reporting wine tasting activities. It strictly follows all official international methodology recommendations for Sensory Analysis of wines and other spirituous beverages, but is flexible enough to modify or extend the tasting methodology.

Where it can be used?

- Professional competitions with blind wine tasting activities.
- Individual or mass-audience wine tasting events with professional or simplified score scale.
- Wine tastings for education or Certification purposes.

What does WineTaste offer?

Besides being strictly compliant with International standards we assures such extra advantages as:

- **Maximum simplicity and mobility** for organising, conducting and reporting a wine tasting event. Compatibility with any mobile device;

- **Elimination of the possibility of errors** arising from manual data processing;

- **Maximum transparency, trustability and security** of the tasting results, as the wine scores are stored using blockchain technology and can be cryptographically audited anytime.

- **High efficiency**, as filling out score sheets in electronic format makes possible an instant results processing and calculation;

- **Advanced reporting features**, granting a fast and easy access to contest results for organisers, judges and participants.
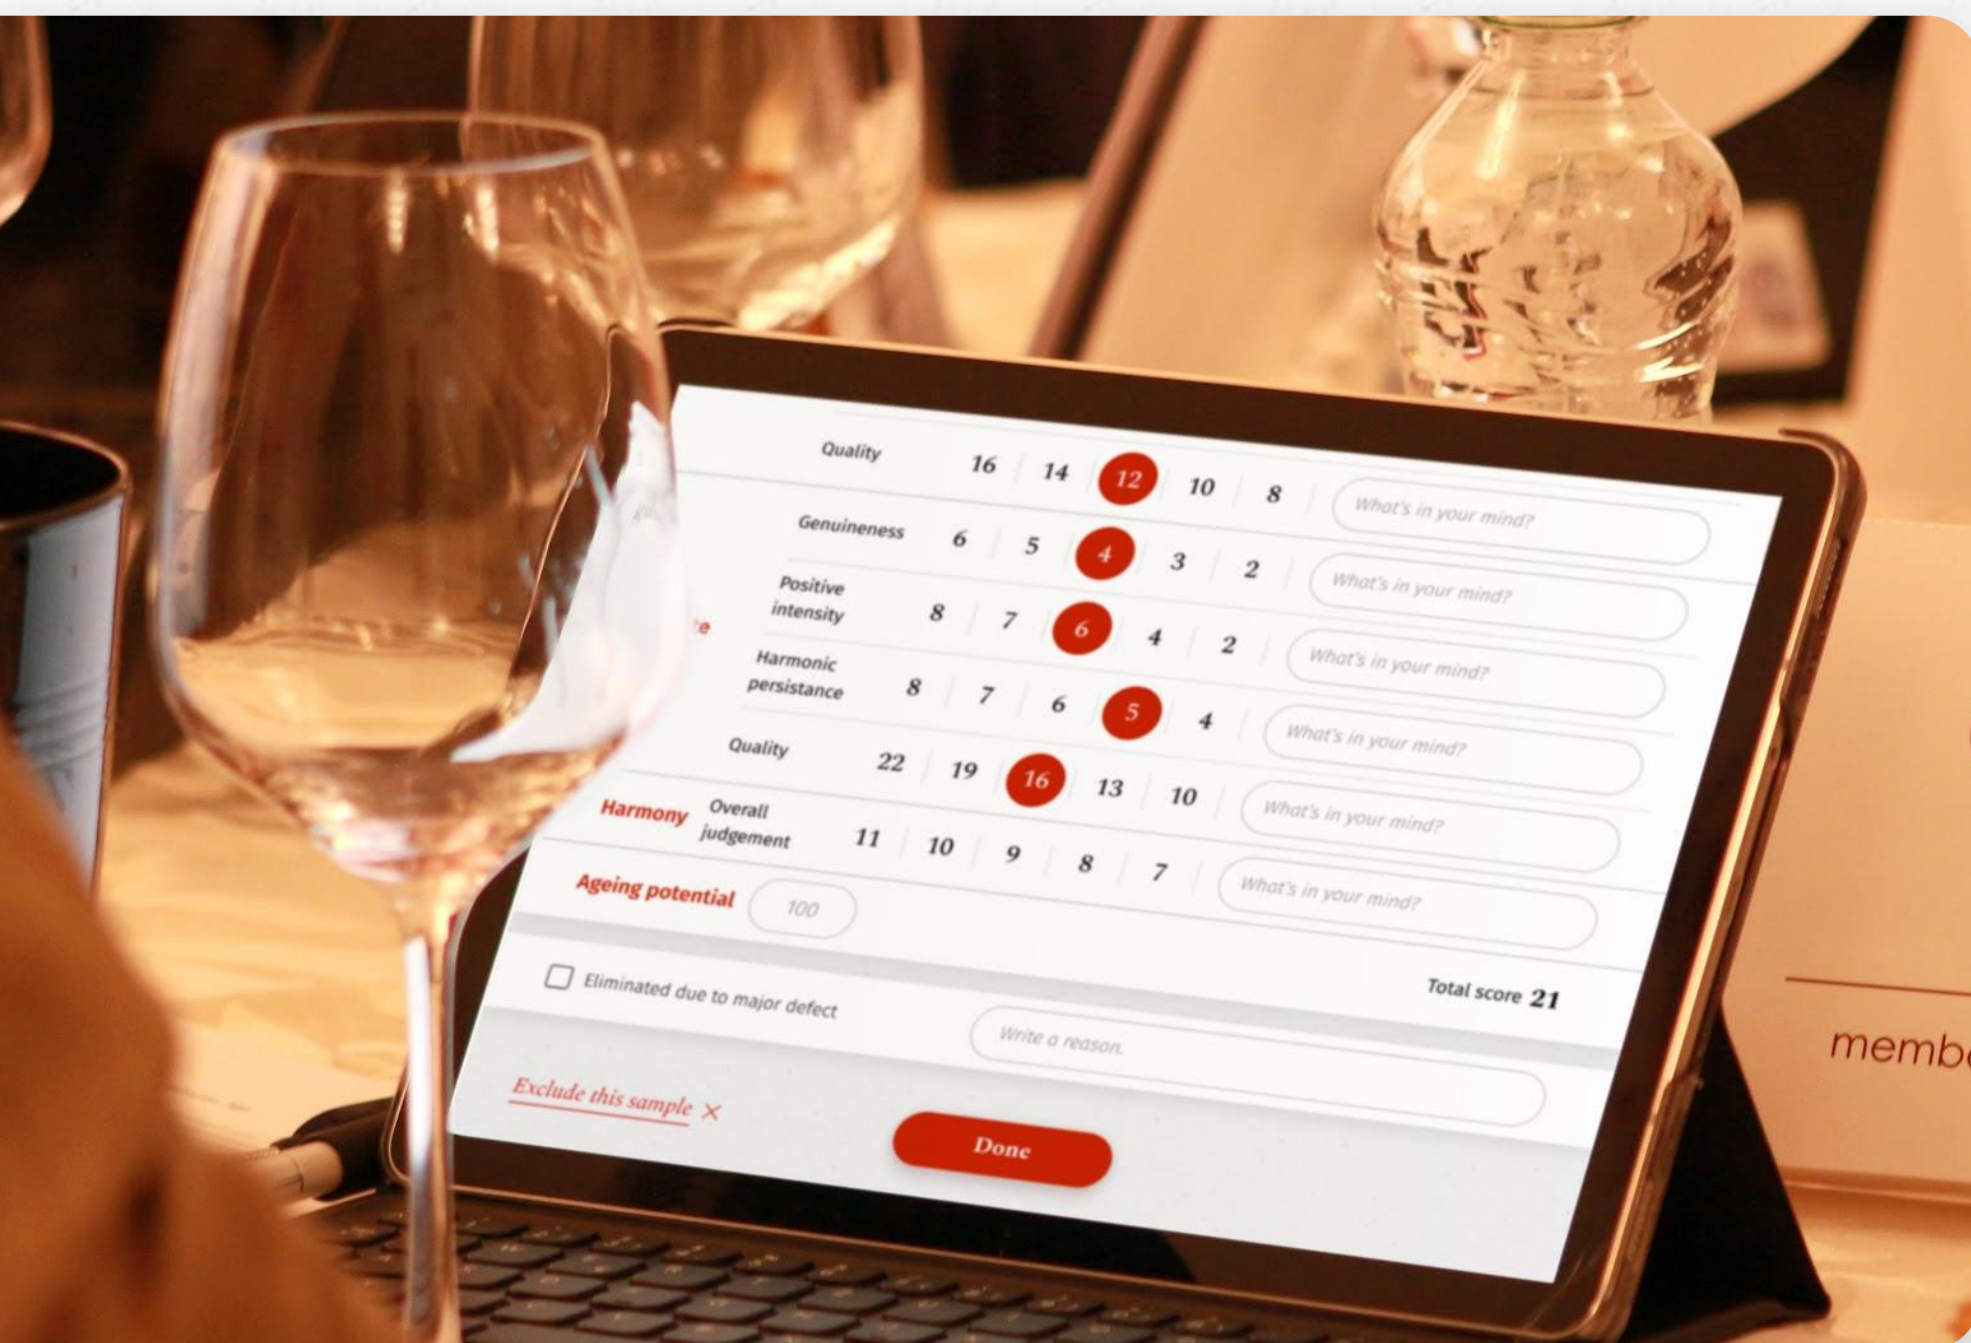

Maximum Simplicity

You can forget about

- Paperwork and obvious related mistakes
- Wine scores processing
- Spreadsheets and formulas
- Downloading, installing and configuring
- Hardware and network issues

Our solution was already used during 13 professional tasting events in 5 different countries, including 8 major international competitions. **One of them was conducted entirely online** .

During these events, our software was used by more than **140 wine professionals** from **19 countries**.

Optional Blockchain Technology

gustos.*life*

Guaranteed credibility

One of the key advantages of WineTaste solution is optional possibility of real-time tracking of the competition process using blockchain technology. This way the **results of the wine tastings can't be deleted, edited or any other way altered**. The authenticity of each database entry can be cryptographically audited anytime.

Transparent reporting

- The organisers will have access to detailed results of all conducted events.

- Judges will have access to all their scores in the events they took part.

- Participants receive detailed reports on all scores of each taster for each of the evaluated parameters for their wines. This way they have access to **professional expertise for each sample of wines** submitted to the competition.

Maximum transparency

As an additional instrument of transparency and, Gustos.Life recommends **organising a live video stream** f the tasting process, accompanied with the real-time database entry log. You can find examples of such broadcasts on the **YouTube channel Gustos.Life**. Thus, the full credibility and invariability of all results is guaranteed.

Detailed report on each sample

Gustos.Life offers added value for competition participants by providing them with access to **complete and detailed information about sample scores**, as well as **specific comments by the jury** about possible product flaws - regardless of whether the sample was awarded a medal or not.

Total score **50**

Ageing potential 100

Done

Judge. Moving to the next sample

Please wait for the next wine sample

After submitting the tasting card for one sample, the Judge has to wait for the rest of the commission to do the same

Judge progress

- Cory Page
- Catherine Stanley
- Josephine Burgess
- Lena Stephens
- Howard Moore
- Ethan Waters
- Nell Hill
- Estelle Harmon

Next sample

The commission Chairman monitors in real time the readiness of each Judge and after all of them have submitted the score sheets for the current sample, the Chairman orders the next one

Judge. The results

gustos.*life*

After the wine tasting activities in a commission are over, each Judge will have access to compare the results of his evaluation of each wine sample (already deanonymized) with the final score it received.

This information will be stored in his account history where he will alway be able to view and print it.
